

Ethics in Artificial Intelligence – A Systematic Review of the Literature

1. Could you broadly describe your area of work?
2. In your area of work what are the ethical considerations in the development and deployment of AI systems?
3. Do you know of any existing frameworks or guidelines in your field of work that ensure/facilitate ethical AI development and deployment?
4. (Based on response from Q3) If so, how do the existing guidelines contribute to ethical AI issues in this field?
5. Are there any emerging trends or developments surrounding ethics in AI within your field?
6. How is the trade-off between different ethical principles in AI such as privacy versus transparency, assessed in your field of work?
7. In your sector how can policymakers and regulatory bodies effectively address ethical challenges related to AI?
8. What are the potential consequences of failing to address ethical concerns regarding AI in your area of work?
9. How do you see the relationship between ethics and AI evolving within your industry in the coming years?
10. Are you aware of any existing resources which group together literature and legislations regarding ethics in AI?
